Sartomer Europe increases prices of oligomers and monomers

Dear Valued Sartomer Customer,

Effective immediately or as soon as contracts allow, Sartomer Europe will increase the prices of its oligomers and monomers.

This decision is forced by the ongoing developments on large series of key raw materials, including but not limited to Acrylic Acid, Epoxies, TPG, DPG, BDO, HDO, isocyanates, TMP, methacrylates. Increases will depend on the nature of the products concerned.

We thank you for your understanding, and we greatly value your business. Any questions you may have can be directed to your local Sartomer sales manager.

With best regards,

Stéphane Guinot,
Business Director, Sartomer EMEA
